Motivation Video Requirements:

An important part of your application is creating a short motivational video. This video should present your personality, your commitment, and your goals in an authentic and creative way. In the motivational video, please describe how you intend to advance the agriculture and food industries, as well as your professional and volunteer work. It should also highlight your medium- and long-term goals for your professional and personal future. Against this backdrop, describe and explain how you plan to use the DLG Young Talents Award to achieve the goals mentioned above (e.g., internship, technical school, study trip, etc.). The video's production quality will be taken into account when evaluating your application. Please note that the technical quality of the video is not the primary focus here. Rather, we are interested in the originality and creative presentation of your content. Make the most of your resources and show us why your application stands out.

Key Topics:

- Your medium- and long-term goals for your professional and personal future
- How do you plan to use the DLG Young Talents Award to achieve your goals?
- Your professional involvement in agriculture/the food industry and your volunteer work

Technical Requirements:

Maximum length: 3 minutes

Format: Portrait orientation, e.g., mp4, mov

File size: max. 25 MB

Resolution: 4K or HD for video

Use of AI: See the document "Using AI in the YTA Application"
