

DLG quality seal for farm inputs: Register new products for the 2024 tests now

Comprehensive test criteria with annually repeated tests - Recognised high practical relevance and recognition - Attractive award for marketing and sales

Quality-conscious companies use the independent and practical control of the DLG (German Agricultural Society) for their products to show their customers that they can trust their products. The DLG Test Center Technology and Farm Inputs offers manufacturers and distributors the opportunity to take part in the 2024 quality tests for farm inputs with new products. Products that pass the extensive expert tests receive the DLG quality seal, the renowned industry award for above-average product quality.

The quality tests carried out by the DLG experts are based on test criteria of high practical relevance. The test frameworks on which the tests are conducted are drawn up for each product group by neutral and independent test commissions consisting of experts from agriculture, science and consultancy and cover all value-determining characteristics of the respective product group. The effectiveness is analysed in the laboratory and in practice, as is any possible negative impact on animals and/or stable facilities, which must be ruled out. The consistently high quality of the tested products is ensured by annually recurring control tests.

"The DLG quality seal has an outstanding reputation in agricultural practice," says Dr Michael Eise, Project Manager at the DLG Test Center Technology and Farm Inputs. "Our test criteria are regularly updated and reflect the current requirements for the respective farm inputs. Thanks to our efficient and regular inspections, companies have the opportunity to position themselves precisely in the market and the DLG quality seal guarantees an excellent product quality when agricultural investment decisions are to be made."

About DLG

The DLG (Deutsche Landwirtschafts-Gesellschaft e.V., German Agricultural Society), founded in 1885 by Max Eyth, is an open network and professional voice of the agricultural and food industry. Its aim is to promote progress through the transfer of knowledge, quality and technology. The DLG has over 30,000 members, is a non-profit, politically independent and internationally networked organisation. As one of the leading organisations in its sector, the DLG organises trade fairs and events in the fields of agriculture and food technology, tests food, agricultural technology and equipment and develops solutions for the challenges of the agricultural and food industry in numerous expert committees.

The subsidiary DLG TestService GmbH is one of the leading service providers in the quality assurance and promotion of food (Frankfurt and Gau-Bickelheim sites), operating resources and agricultural and vehicle technology (Groß-Umstadt site). The range of services covers the entire spectrum of quality testing, quality management, quality assurance, audits, certifications, awards and customer-specific quality projects, right through to research and development of accompanying tests.
