Inhouse Farming – Feed & Food Show 2026: Highlights at a glance

A hub for knowledge transfer and networking – 10–13 November 2026 at the Hanover Trade Fair Grounds – DLG Spotlight and Theme Days offer new perspectives for the value chain – www.inhouse-farming.com

The "Inhouse Farming - Feed & Food Show" is the showcase for agricultural and food systems of the future. The extensive technical programme of the DLG (German Agricultural Society) B2B platform will address the key issues of tomorrow's value chain at the trade fair grounds in Hanover from 10 to 13 November 2026. The DLG Spotlight and the Theme Days on the Expert Stage offer inspiration, expertise and cross-industry contacts. "Inhouse Farming" optimally complements the world's leading trade fair, EuroTier, and EnergyDecentral, the leading international platform for decentralised energy supply, which will take place at the same time, offering new perspectives and business models for the agri-food sector.

Alternative proteins and circular value chain concepts are among the key issues for the future of the agri-food sector. The DLG Spotlight Inhouse Farming offers visitors an insight into innovative production systems and sustainable solutions for resource-efficient food and feed production. The focus is on practical examples from the fields of insects, edible and medicinal fungi, and aquaculture. The DLG Spotlight is sponsored by REPLOID Group AG. Other contributors to the Spotlight section include Festo SE & Co. KG, LIVIN farms AgriFood GmbH and the Bundesverband Aquakultur e.V.. Together, they demonstrate how side streams can be put to good use, material cycles closed and potential for sustainable value creation tapped into. The DLG Spotlight is located in Hall 25, Stand L22.

Expert Stage Inhouse Farming – Theme Days

The Expert Stage at the Inhouse Farming Show, with its four Theme Days, focuses on

key issues for the future of modern, controlled food production. Experts from science, business and practice provide insights into current developments, innovative technologies and concrete solutions. These range from automated production and alternative protein sources to sustainable and resilient value chains. All events will take place in Hall 25, Stand L23.

Tuesday, 10 November 2026 – Mushrooms, earthworms and biomass

From residual material recycling to innovative materials

Mushrooms and earthworms offer great potential for a sustainable circular economy: as a basis for innovative materials, for improving soil quality and animal health, and for converting residual materials into valuable animal feed. On this Theme Day, experts will present tried-and-tested technologies and business models for farming operations.

Wednesday, 11 November 2026 – Aquaculture

Fish, prawns & algae in an indoor system

The Theme Day offers insights into modern recirculating aquaculture systems and photobioreactors. Practical examples from salmon, prawn and algae farms illustrate current developments and potential applications. In addition, integrated energy and production concepts will be presented and discussed. A critical review of current market opportunities, along with an “aquatic happy hour”, will round off the day’s programme.

Thursday, 12 November 2026 – Insects

Insects as a building block of sustainable agricultural systems

The Theme Day brings together perspectives on animal feed and human food: Market potential, processing technologies, legal frameworks, practical experience and operational models. Deep Dives and tastings demonstrate how insects can already create added value today.

Friday, 13 November 2026, from 10 a.m. – Retail & Innovation Day

The Retail & Innovation Day of the Inhouse Farming – Feed & Food Show shows how sustainable food, alternative protein sources and innovative production methods are shaping the future of the retail sector. The focus is on current FoodTech trends, forward-looking nutrition concepts and their impact on the retail food trade, start-ups and consumers.

You'll find an overview of all the programme items in the detailed events calendar at:

DLG. Progress and sustainability in agriculture and the food industry

The DLG (Deutsche Landwirtschafts-Gesellschaft e.V. - German Agricultural Society), founded in 1885 by Max Eyth, stands for productivity and resource conservation in a sustainable and innovation-friendly agricultural and food value chain. The goal of the DLG is to promote progress through the transfer of knowledge, quality and technology. The DLG has more than 30,000 members, is a non-profit organisation, politically independent and internationally networked. As one of the leading organisations in its industry, the DLG organises trade fairs and events in the fields of agriculture and food technology and tests food, agricultural machinery and farm inputs. With its specialist centres for agriculture and food and the media of the DLG publishers, the DLG stands for independent know-how transfer. In addition, the DLG works in numerous national and international expert committees to develop solutions for the challenges facing the agricultural, agri-food and food industries.
