

„Grey List“

Standards Commission for Straight Feeding Stuffs

State: February 2019

The straight feeding stuffs listed below are now to be classified as feed additives or deleted from the positive list as a result of changes in feed legislation or due to lack of market relevance. Therefore the classification as straight feeding stuff in the positive list is eliminated. In the 13th edition of the positive list (finalisation February 2019) these feeding stuffs are as a result of this no longer listed. Until final clarification, these products remain on the "grey list" and may be used under recognition of QS and QM up to final regulation.

Number	Designation	Description	⁵⁾ Distinguishing features (%)	⁵⁾ Requirements (%)	⁵⁾ Instruction for labelling (constituents to be declared)	Additional information on the production process	Remarks
02.15.02	Sunflower cake	By-product of oil manufacture, obtained by pressing of seeds of the sunflower from which part or all of the husks have been removed.		Crude fibre max. 25	Crude protein Crude fibre	Data sheet required	deleted due to double entry
02.22.01	Lecithin, raw (crude lecithin)	Product obtained from crude vegetable oils by separation of oil		Acetone insoluble min. 55	Acetone insoluble Crude ash The designation may be replaced by „De-oiled lecithin“	Data sheet required	Missing distinction to additives.
02.22.02	Lecithin, de-oiled (de-oiled lecithin)	Product obtained by de-oiling of crude lecithin		Acetone insoluble min. 90	Acetone insoluble Crude ash The designation may be replaced by „De-oiled lecithin“	Data sheet required	Missing distinction to additives.
11.01.01	Calcium acetate	Product consisting of technically pure calcium acetate, including crystal water			Calcium	Data sheet required	Classification as additive in clarification.
11.01.05	Calcium citrate	Product consisting of technically pure calcium citrate			Calcium	Data sheet required	Classification as additive in clarification.

Number	Designation	Description	⁵⁾ Distinguishing features (%)	⁵⁾ Requirements (%)	⁵⁾ Instruction for labelling (constituents to be declared)	Additional information on the production process	Remarks
11.01.06	Calcium formate	Product consisting of technically pure calcium formate			Calcium	Data sheet required	Classification as additive in clarification
11.01.09	Calcium lactate	Product consisting of technically pure calcium lactate			Calcium	Data sheet required	Classification as additive in clarification
11.01.10	Calcium propionate	Product consisting of technically pure calcium propionate			Calcium	Data sheet required	Classification as additive in clarification
11.01.43	Sodium formate	Product consisting of technically pure sodium formate			Sodium	Data sheet required	Classification as additive in clarification
11.01.44	Sodium propionate	Product consisting of technically pure sodium propionate			Sodium	Data sheet required	Classification as additive in clarification
17.01.01	Ammonium acetate for bovine, sheep and goats with functioning rumen	Product consisting of ammonium acetate in aqueous solution CH ₃ COONH ₄		Ammonium acetate in the product as such min. 55	Nitrogen Moisture	Data sheet required	Classification as additive in clarification
