

„Grey List“

Standards Commission for Straight Feeding Stuffs

State: September 2021

The straight feeding stuffs listed below are now to be classified as feed additives or deleted from the positive list as a result of changes in feed legislation or due to lack of market relevance. Therefore the classification as straight feeding stuff in the positive list is eliminated. In the 14th edition of the positive list (finalisation July 2021) these feeding stuffs are as a result of this no longer listed. Until final clarification, these products remain on the "grey list" and may be used under recognition of QS and QM up to final regulation.

Number	Designation	Description	⁵⁾ Distinguishing features (%)	⁵⁾ Requirements (%)	⁵⁾ Instruction for labelling (constituents to be declared)	Additional information on the production process	Remarks
02.20.02	Hemp expeller	By-product of oil manufacture obtained by pressing hemp seeds, Cannabis sativa L.		Tetrahydrocannabinol max. 0.2	Crude protein	02.20.02	Hemp expeller
02.22.01	Lecithin, raw (crude lecithin)	Product obtained from crude vegetable oils by separation of oil		Acetone insoluble min. 55	Acetone insoluble Crude ash The designation may be replaced by „De-oiled lecithin“	Data sheet required	Missing distinction to additives.
02.22.02	Lecithin, de-oiled (de-oiled lecithin)	Product obtained by de-oiling of crude lecithin		Acetone insoluble min. 90	Acetone insoluble Crude ash The designation may be replaced by „De-oiled lecithin“	Data sheet required	Missing distinction to additives.
11.01.58	Tripotassium citrate	Product consisting of technically pure tripotassium citrate			Potassium	Data sheet required	
11.01.39	Sodium acetate	Product consisting of technically pure sodium acetate			Sodium	Data sheet required	

Number	Designation	Description	⁵⁾ Distinguishing features (%)	⁵⁾ Requirements (%)	⁵⁾ Instruction for labelling (constituents to be declared)	Additional information on the production process	Remarks
17.01.01	Ammonium acetate for bovine, sheep and goats with functioning rumen	Product consisting of ammonium acetate in aqueous solution CH ₃ COONH ₄		Ammonium acetate in the product as such min. 55	Nitrogen Moisture	Data sheet required	Classification as additive in clarification
17.01.02	Ammonium lactate from fermentation for bovines, sheep and goats with functioning rumen	Ammonium lactate produced by fermentation of whey with Lactobacillus bulgaricus		Crude protein in the product as such min.44	Crude protein Crude ash Moisture	Data sheet required
